My portfolio

PROFILE

Aspiring AI automation engineer and data analyst passionate about building intelligent AI agents and automated data pipelines that turn raw data into actionable business and financial insights. Skilled in Python scripting, Google Apps Script, AI agent development, and API integrations. Currently developing practical automation solutions such as AI news intelligence agents and smart Google Sheets dashboards while actively upskilling through AI and data analytics certifications. Eager to create value-driven AI tools for businesses, entrepreneurs, and traders.

EDUCATION

2024 - 2028

CM SHRI SCHOOL

- Currently in 11th class
- Taken commerce field
- Studying core commerce subjects including accounting, Business Studies, Economics, and Business Mathematics
- Building foundational knowledge in business processes, financial analysis, and market dynamics
- Actively applying commerce concepts while learning AI automation and data analytics

PROJECTS

Made by Mindstudio.ai

AI News Intelligence Agent **2026 - Completed**

- Developed automated agents using News API, Vertex AI, and Botpress to fetch, clean, and deliver daily curated news for business, science, AI, and stock market domains.
- Implemented scheduling and data storage pipelines for consistent intelligence delivery.
- Significantly reduced manual research time for users.

Automated Google Sheets Dashboard with AI **In Progress**

- Built Python + Google Apps Script integration with Vertex AI to create smart dashboards for business and stock market intelligence.
- Automated data fetching, cleaning, visualization, and scheduled notifications.
- Enabled real-time insights and automated reporting for better decision-making.

Certifications **2025-2026**

- Vibe Coding – Analytics Vidhya (In Progress)
- Yuva AI – FutureSkills (In Progress-60% Completed)
- Google Data Analytics Professional Certificate (Planned)

SKILLS

- AI Agents & Automation (Vertex AI, Botpress)
- Python Programming & Scripting
- Google Apps Script & Google Workspace Automation
- Data Pipelines & ETL Processes
- API Integration (News API and others)
- Data Analytics & Business Intelligence
- Prompt Engineering & LLM Integration
- Low-Code/No-Code Automation Tools
- Git & GitHub for version control

Additional Activities

- Engaging in daily AI automation projects with a dedicated learning and building schedule from 4 PM to 12 AM
- Pursuing self-directed learning in AI agents, data analytics, and automation tools through organized online courses
- Consistently investigating the applications of AI in business intelligence and stock market analysis
- Actively documenting and presenting projects on GitHub to enhance portfolio development
